

Workshop A Discussion: what belongs to a swimming pond, what not

Udo Schwarzer and his wife Claudia have been managing a swimming pond planning company in Portugal for 25 years. Over 200 projects have been realized during this time. Development of the PONDAnalyst software for the swimming pond industry for the interpretation of water analyzes. Collaboration on various publications on swimming pond. Currently on the board of the Iberian swimming pond association GIABN, from 2009 to 2017 he was chairman of the International Organization for Natural Bathing Waters (IOB).

The working group "What belongs in a swimming pond and what not?" wants to ask and discuss border issues. There are many answers to this question. For example, many regulations define what a swimming pond is.

However, the working group wants to look at the topic differently, so it does not ask what a swimming pond is, but what belongs in there.
